Guide to Front Entry & Garage Door Replacement

Please understand this guide is designed to assist you in gathering general information and rough measurements. If you decide to move forward with a project a representative of Aspen River Wood & Glass Co. will schedule an onsite visit to take exact measurements and confirm all project components.

1. Which direction does the proposed home elevation face? (Check one)
 - North
 - East
 - West
 - South

2. Does the current entry/garage door have any overhang or roof protecting it from the weather/sun? Yes No

3. If you have an overhang or roof what is the approximate projection (i.e. how far out does the roof or overhang extend past the door)? _____ (in ft.)

4. Gather some rough measurements (the best way to get these rough measurements are from the interior/inside)
 - Rough height of the overall unit: _____ (in inches)
 - Rough width of the overall unit: _____ (in inches)

5. Take a few pictures of your existing entry/garage from these locations:
 - A close up from the inside
 - A close up from the outside
 - A couple of pictures from the curb or yard (the key is to get as much of the home as possible)
